SUMMARY

Full Stack & AI Developer with 4+ years of experience building scalable web and AI-powered applications. Skilled in frontend and backend development, intuitive user interface design, scalable API integration, cloud deployment, RAG (Retrieval-Augmented Generation) pipelines, AI Agents, LLM integration, vector databases, semantic search, and performance optimization. Proficient across the full software development life-cycle, from requirements gathering to deployment, leveraging modern frameworks and AI technologies to deliver intelligent, reliable, and future-ready solutions.

SKILLS

- Languages:** HTML5, CSS3, JavaScript, TypeScript
- Frontend:** React.js, Next.js, Redux, Vite, Tailwind CSS, Bootstrap
- Backend:** Node.js, Express.js
- AI/ML:** LangChain, LangGraph, OpenAI, RAG Pipelines, AI Agents, Agentic AI, Vector Embeddings, Qdrant, ChromaDB, LLM Integration,
- Databases:** MongoDB (Local and Atlas), Supabase, PostgreSQL
- Testing:** React Testing Library, Cypress
- Tools:** Git, GitHub
- Hosting:** Vercel, Netlify, Onrender, AWS

EXPERIENCE

Jun 2025 - Present	Booming Bulls Academy Noida, Uttar Pradesh Role - Full Stack & AI Developer Technologies Used - Next, JavaScript, TypeScript, Vite, Redux Toolkit, Node, Express, OpenAI APIs, LangChain, LangGraph, RAG Pipelines, Agentic AI, AI Agents, LLM Integration, MCP (Model Context Protocol) Database and Hosting - MongoDB, PostgreSQL, Supabase, Qdrant, ChromaDB, Vercel, Render, AWS, Google Cloud Platform (GCP), Grafana
Jan 2023 - Jun 2025 (2.6 years)	Stech Software Solution Pune, Maharashtra Role - Full Stack & AI Developer Technologies Used - React, Next, TypeScript, JavaScript, Redux Toolkit, Node, Express, Cypress, OpenAI APIs, RAG Pipelines, AI/LLM Integration Database and Hosting - MongoDB, PostgreSQL, Supabase, Qdrant, ChromaDB, Vercel, AWS, Google Cloud Platform (GCP)

PROJECTS

Skillscan AI	Tech Stack: Next, JavaScript, Tailwind CSS, LangChain, OpenAI, Embedding, Qdrant, RAG Pipeline  - Built an AI-powered resume analysis platform using OpenAI GPT-4 for candidate evaluation and job matching - Implemented an end-to-end RAG pipeline using LangChain, OpenAI Embeddings, and Qdrant Vector DB for semantic search and retrieval - Engineered cosine similarity scoring and semantic skill extraction to accurately rank candidates against job descriptions - Integrated LangChain agents for intelligent query processing and automated candidate shortlisting - Developed multi-resume comparison and AI-driven candidate recommendation workflows for recruiters
Superior Trading Dashboard	Tech Stack: Next, TypeScript, Node, Express, Redux, Shadcn UI, PostgreSQL, OpenAI, LangChain, Qdrant, RAG, Vercel, AWS, GCP, Grafana  - Built a secure trading platform with JWT authentication, OTP verification, 2FA, and complete KYC/AML onboarding workflows - Integrated crypto wallets, payment gateways, and identity verification services for seamless transaction processing - Integrated trading tools including TradingView charts, MetaTrader 5 (MT5), and Autochartist integrations - Implemented AI-powered trading assistance using OpenAI, LangChain, and RAG for contextual user support - Built semantic search and document retrieval using OpenAI Embeddings and Qdrant Vector DB - Developed AI Agents for intelligent query handling, knowledge retrieval, and automated user assistance - Engineered embedding-based search and ranking mechanisms using OpenAI Embeddings and vector similarity search for improved retrieval accuracy - Implemented intelligent document indexing, chunking, and metadata filtering pipelines to optimize RAG performance and response relevance - Designed scalable AI workflows leveraging LangChain, Qdrant, and LLMs for contextual knowledge retrieval and automated support automation - Built IB (Introducing Broker) module, ticketing system, multi-account management, and real-time analytics dashboards

Zuperior Website

Tech Stack: Next, JavaScript, Redux, Node, Express, OpenAI, LangChain, Qdrant, RAG, Vercel, AWS

- Developed Trading and Risk Management Calculator, Currency Converter, and Price Range Analyzer for retail traders
- Integrated Market News API and Economic Calendar API for real-time financial news and event-driven market insights
- Built a domain-specific AI support assistant using OpenAI, LangChain, and RAG for trading-related user support
- Implemented document chunking, OpenAI Embeddings, and vector search to create an intelligent knowledge base
- Developed semantic search and retrieval workflows using Qdrant Vector DB for context-aware information retrieval
- Designed AI-powered support automation with conversation memory and retrieval-based response generation
- Implemented smooth animations using Framer Motion, GSAP scroll-triggered effects, and Lenis inertia scrolling
- Integrated EmailJS for lead generation forms and Zeptomail SMTP for transactional email flows

AI-Portfolio

Tech Stack: Next, JavaScript, LangChain, Google Gemini, RAG, Vercel

- Built an AI-powered portfolio assistant using Google Gemini and LangChain to answer visitor queries about skills, projects, and experience
- Implemented context-aware conversation workflows with prompt engineering, conversation memory, and intelligent response generation
- Developed semantic search and retrieval mechanisms to provide accurate, personalized responses from portfolio knowledge sources
- Integrated multi-model fallback architecture (Gemini 2.0 Flash → Gemini 1.5 Flash) for improved reliability and cost optimization
- Designed a modern conversational UI with Markdown rendering, streaming responses, glassmorphism effects, and responsive layouts
- Secured AI endpoints using Next.js server-side API routes and deployed the application on Vercel

EDUCATION

2022	Bachelor of Computer Application (BCA) Shivaji University, Karmveer Bhaurao Patil Institute of Management Studies and Research	Marks - 81.00 %
2019	12th Computer Science State Board of Education, Lal Bahadur Shastri College, Satara	Marks - 53.23 %
2017	10th English Medium State Board of Education, New English School, Satara	Marks - 71.00 %

ACHIEVEMENTS

2023-2025	Employee of The Shining Star and 4 times Employee of The Month Stech Software Solution	Pune, Maharashtra
-----------	--	-------------------

CERTIFICATIONS

2026	AI Developer Turtlenut Technologies	Pune, Maharashtra
2023	Full Stack Deployment Stech Software Solution	Pune, Maharashtra

PROFESSIONAL HIGHLIGHTS

- Built production-grade RAG pipelines using LangChain, OpenAI Embeddings, and Qdrant Vector DB for intelligent knowledge retrieval
 - Developed AI Agents leveraging LLMs, semantic search, and vector databases for automated query processing and contextual assistance
 - Engineered embedding-based candidate ranking and semantic matching algorithms for AI-powered resume
- screening and recruitment workflows
 - Designed scalable AI architectures with document chunking, metadata filtering, vector search, and retrieval optimization techniques
 - Developed secure fintech platforms with KYC/AML workflows, 2FA authentication, crypto wallet integration, and payment gateway automation
